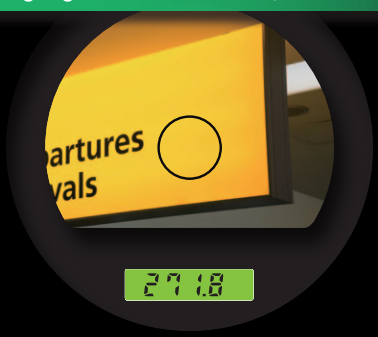
Chroma Meter CS-150/CS-160

NEW

New models with higher accuracy and comfort of use !

Chroma Meter CS-150 measures color and luminance with 1° measuring angle across a 0.01 to 999,900 cd/m² range.



Chroma Meter CS-160 measures color and luminance with 1/3° measuring angle across a 0.1 to 9,999,000 cd/m² range.

The Standard in Measuring Color & Light

Giving Shape to Ideas

1 High accuracy

The CS-150 and CS-160 are highly accurate tristimulus colorimeters equipped with newly designed sensors with spectral responses that more closely match the CIE 1931 color-matching functions representing the sensitivity of the human eye to provide measurement results that better correlate with visual evaluation.

* The $\bar{x}(\lambda)$ CIE 1931 color-matching function has two peaks, a small one in the short-wavelength region (often labeled $\bar{x}_1(\lambda)$) and a larger one in the long-wavelength region (often labeled $\bar{x}_2(\lambda)$). In conventional tristimulus colorimeters, the $\bar{x}(\lambda)$ sensor has a spectral response only for the long-wavelength region $\bar{x}_2(\lambda)$, and the data for the short-wavelength region $\bar{x}_1(\lambda)$is calculated from the $\bar{z}(\lambda)$ sensor. But the CS-150 and CS-160 have spectral responses that more closely follows the CIE 1931 color-matching functions, and directly measures using the $\bar{x}(\lambda)$ response in both the short-wavelength region $\bar{x}_1(\lambda)$ and long-wavelength region $\bar{x}_2(\lambda)$, so the resulting instrument spectral response more closely matches the CIE 1931 color-matching functions for the human eye.

3 Numerous optional accessories

Close-up lenses
Lineup of 4 lenses (Nos. 153, 135, 122, and 110) enable measurements of tiny areas.

***Measuring distance is the distance from the measuring distance reference plane.**

C-mount CCD camera adapter enables the viewfinder to be monitored from a distance.

This adapter allows an industrial C-mount CCD camera to be attached to the viewfinder so that measurements including the view through the viewfinder can be monitored from a distance or recorded.
* CCD camera not included.

Illuminance adapter enables illuminance to also be measured.

Measurable illuminance range:
- CS-150:
  Corresponds to 0.15 - 999,900 lx
- CS-160:
  Corresponds to 1.5 - 9,999,000 lx

* This illuminance measuring method does not conform to DIN or JIS standards.

4 Easy-to-understand utility software

The included software allows the meters to be controlled from a PC. Repeated interval measurements can be conducted for a specified number of times at specified intervals, measurement data can be displayed on graphs or lists, and data can be sent to spreadsheet applications.

Supported OS: Windows® 7 Professional 32 bit, 64 bit
Windows® 8.1 Pro 32 bit, 64 bit
Windows® 10 Pro 32 bit, 64 bit
